<b>Description</b>			
Psychology is a branch of science that studies human behavior. It looks at how people think, feel, and behave. In order to understand people, psychologists study how people think, feel and act. They study the motivations behind behavior and the effects of social interactions.			

#### History

##### #1 - 06/07/2022 01:06 PM - Anonymous

They look at how people interact with each other and how they react to certain situations. Theories and findings about people help psychologists better understand human behavior. The field of psychology has several branches including clinical psychology, counseling psychology, forensic psychology, developmental [[<https://www.assignmentdoer.com/psychology-assignment-help.php> cheap psychology assignment ]], educational psychology, industrial/organizational psychology, cognitive psychology, social psychology, and personality psychology.
