

LustreC - Bug #72

Simulinkd does not match Lustre using EMF backend when using nested Merge expression

03/22/2019 03:56 AM - Hamza Bourbough

Status:	New	Start date:	03/22/2019
Priority:	Normal	Due date:	
Assignee:	Pierre-Loïc Garoche	% Done:	0%

Target version:			
Description			
Lustre attached uses merge and one of merge branches is a call to another node with a merge inside. Inside merge, the node call is reset using every operator. I couldn't find where is the problem in the simulink model (attached too).
